

Define schema

```
1 type Episode {  
2   id: ID!  
3   name: String!  
4   description: String  
5   airDate: Date  
6   characters: [Character]  
7 }
```

Make a query

```
1 {  
2   episode(name: "Pickle Rick") {  
3     description  
4     characters {  
5       name  
6     }  
7   }  
8 }
```

Get results

```
1 {  
2   episode {  
3     description: "Rick turns himself  
into Pickle Rick to avoid going to  
family therapy..."  
4     characters: [  
5       { name: "Rick Sanchez" },  
6       { name: "Morty Smith" },  
7       { name: "Beth Smith" },  
8       ...  
9     ]  
10 }
```

Define schema

```
1 type Episode {  
2   id: ID!  
3   name: String!  
4   description: String  
5   airDate: Date  
6   characters: [Character]  
7 }
```

Make a query

```
1 {  
2   episode(name: "Pickle Rick") {  
3     description  
4     characters {  
5       name  
6     }  
7   }  
8 }
```

Get results

```
1 {  
2   episode {  
3     description: "Rick turns himself
