

What is good

**conclusion**

• Fullstack safety, this is super powerful 

- Great developer experience with autocomplete, validation and code generation right in IDE

- The speed of implementation for new features has drastically increased, without sacrifice in quality.

- Auto generated always up-to-date documentation and playground, that does not take any time to maintain

## Conclusion /

# What is good

- **Full stack type safety**, this is super powerful 🚀
- Great **developer experience** with autocomplete, validation and code generation right in IDE
- The **speed of implementation** for new features has drastically increased, without sacrifice in quality.
- Auto generated always up-to-date **documentation** and playground, that does not take any time to maintain
