What is good

Conclusion /

Full stack type safety, this is super powerful #

 Great developer experience with autocomplete, validation and code generation right in IDE

 The speed of implementation for new features has drastically increased, without sacrifice in quality.

 Auto generated always up-to-date documentation and playground, that does not take any time to maintain

Conclusion /

What is good

- Full stack type safety, this is super powerful 🚀
- Great developer experience with autocomplete, validation and code generation right in IDE
- The **speed of implementation** for new features has drastically increased, without sacrifice in quality.
- Auto generated always up-to-date documentation and playground, that does not take any time to maintain

Conclusion /

What is good
